Step 1 — Linksys EA6900 Disassembly

- Remove the antennas by unscrewing them from the base.
- Flip over the device and locate the four rubber feet on the bottom.
- Remove the rubber feet with tweezers

Step 2

- Remove the 0.4cm head screws from each slot with the #1 Phillips head Screwdriver.

Step 3

- Use a blue plastic opening tool to remove the top cover.
- Move the blue plastic opening tool gently underneath the top cover from side to side.

Step 4

- Gently lift the motherboard and remove it from the case
- Put the motherboard over a (preferably white) surface.

Step 5 — Power Port

- Locate the power port on both sides of the motherboard.
 - The power port on the top side is in a rectangular black casing.
- Identify the three prongs where the power port is soldered to on the reverse side.

Step 6

- Carefully apply the soldering iron on each of the three points on the bottom side of the motherboard to melt them.
- ⚠ Be careful to not touch the motherboard with the soldering iron, you can damage the circuits.
- After you have melted and removed the solder, flip the mother board around and identify the connecting points of the power port.
- Use a black spudger to gently separate the power port from the motherboard

To reassemble your device, follow these instructions in reverse order.
